Writing Functions

Determine a relationship between the x - and y -values. Write an equation.

1.

x	-2	-1	0	1
y	4	1	0	1

2. $\{(-1, -4), (0, -2), (2, 2), (5, 8)\}$

Identify the independent and dependent variables in each situation.

3. More program money is given out to cities with a larger population.

I: _____

D: _____

4. Sales tax in the state of Maryland is 5% of the purchase price.

I: _____

D: _____

Identify the independent and dependent variables. Write a rule in function notation for each situation.

5. Meg earns a \$5 flat fee plus \$4.50 per student for a tutoring session.

6. Jeb is allowed 2 hours less television time per week than his older brother.

Evaluate each function for the given input values.

7. For $f(x) = 3x + 2$, find $f(x)$ when $x = 4$ and when $x = -1$. _____

8. For $g(x) = -6x$, find $g(x)$ when $x = -5$ and when $x = 3$. _____

9. For $h(x) = x^2 - 4$, find $h(x)$ when $x = 2$ and when $x = -7$. _____

Complete the following.

10. A fitness class is being offered twice a week for four weeks. The registration fee is \$8.50 and the cost for each class attended is \$4.75.

Write a function rule to describe the total cost of the class. Find a reasonable domain and range for the function.
